

POCF
246 N. Dickinson Ave
Hesperia Mi. 49421

Cystic fibrosis is an inherited chronic disease that affects the lungs and digestive system of about 30,000 children and adults in the United States (70,000 worldwide).

There is no cure for CF. There has been great improvement in the past 10 years. The median life expectancy with CF is 37 years. Many children and young adults lose their battle too soon.
